

CICS V3.2 Fundamentals (WM800DE)

Veranstalter: IBM Deutschland GmbH

Kursziele

CICS V3.2 Fundamentals is an entry-level course that provides basic knowledge of CICS Transaction Server V3.2 concepts and facilities that are applicable to all of the CICS family of products. The course explores the CICS application programming interface (API), along with general guidelines and programming aids that support application development. This course provides the prerequisite knowledge for all of the subsequent CICS application and systems programming courses. The course includes hands-on lab exercises designed to reinforce the lecture material and give the student a chance to practice the basics of CICS transaction processing and system management.

Kursinhalte
