

CICS V3.2 Basic Tailoring (WM810DE)

Kurssprache ist Deutsch + original IBM-Kursunterlage in englisch

Kursziele

CICS V3.2 Basic Tailoring is designed to teach CICS system programmers the basics of how to install and tailor CICS Transaction Server (TS) for z/OS. Students learn to tailor the system by defining transactions, programs, files, and the other resources that are needed by CICS applications. This course also provides a thorough introduction to security and recovery concepts necessary for the administration of new or existing installations of CICS TS.

Students practice their new skills using a z/OS system configured specifically for this lab-intensive course. Lecture topics include problem determination tools, intersystem communication, CICS DB2, Database Control (DBCTL), and IBM MQSeries interfaces.

Kursinhalte

- Course introduction
 - CICS TS for z/OS overview
 - Installation and verification
 - Exercise: Getting acquainted with CICS TS for z/OS
 - Resource definition online
 - Exercise: Using the RDO Batch Utility DFHCSDUP
 - Supporting terminal access
 - Exercise: Administering terminals
 - Defining transactions, programs, and map sets
 - Exercise: Defining transactions, programs, and map sets
 - File control functions and file definition
 - CICS TS queuing facilities
 - Exercise: Defining files and (optionally) LSR pools
 - Exercise: Defining transient data queues
 - CICS intercommunication services
 - Exercise: Connecting systems
 - System control
